## Emgold Completes Airborne Geophysics on Stewart and Rozan Properties

**Emgold Mining Corporation** ( EMR- TSX Venture ) is pleased to report that it has received the final results of airborne electromagnetic and magnetic surveys for the Stewart and Rozan Properties, located in southeastern British Columbia.

The surveys, flown in December 2003, have been reviewed by Peter E. Walcott and Associates (a geophysical contractor) who has identified several moderate to strong, well defined electromagnetic conductors that may be representative of sulphide mineralization, some of which are associated with magnetic gradients that could reflect faults and/or shears.

Emgold is currently integrating these results with previous geological mapping, geochemical and induced polarization surveys, and limited diamond drilling carried out over various parts of the properties in order to plan the summer 2004 exploration program. Additional information regarding the exploration program will be announced upon completion of the evaluation of the results.

The Rozan Property is a highly prospective gold property where grab samples returned values of up to 29.68 g/t gold from historic waste dumps. Initially discovered in 1928, a small mining operation on the Property yielded 115 tons containing 127 ounces of gold with small amounts of silver, lead and zinc. Since that time only limited exploration has been undertaken on the Property. In 2000 a small drill program by Emgold intersected 1.45 g/t gold over 4.1 meters and 60.73 g/t gold over 0.25 meters.

Mineralization on the Stewart Property contains significant values of molybdenite and tungsten. Four areas of interest have previously been identified for follow-up: the North Gold Zone, the Silver King Porphyry Zone, the QPP Stockwork Zone, and the Arrow Tungsten Zone. Recent grab samples from the historic Arrow working returned 1.03% WO<sub>3</sub> and 4.0% Zn.

For more information about Emgold, the Stewart and Rozan Properties, the Idaho-Maryland Project and the Ceramex™ process please visit the Company's website [www.emgold.com](http://www.emgold.com) or [www.sedar.com](http://www.sedar.com).
